
DRK116 Beating Pulp Tester

DRK116 Beating Pulp Tester is applied to test the filter ability of suspending pulp liquid. That is to say the determination of the beating degree.

Product features

According the inverse proportion relation between beating degree and draining velocity of suspending pulp liquid, designed as Schopper-Riegler beating degree tester. DRK116 Beating Pulp Tester is applied to test filterability of suspending pulp liquid and research fiber condition and evaluate beating degree.

Product application

Applying in testing filter ability of suspending pulp liquid, that is to say the determination of the beating degree.

Technical standards

ISO 5267.1

GB/T 3332
